

### A disciplined, analytical approach to insurance for High Net Worth clients.

Trouette Insurance Agency works collaboratively with financial advisors, CPA's and Attorneys to protect HNW clients - and their wealth.

Most HNW clients treat insurance as a commodity – or an afterthought (just like everyone else.)

Here's the problem: As wealth increases, HNW clients don't realize they create significant risk and liability as they add high value homes, investment properties, non-profit boards, household employees, etc. to their lifestyle. Despite an ever-increasing risk curve, insurance does not keep pace. This creates exposure for HNW clients – and puts their wealth unnecessarily at risk should misfortune strike.

Our Comprehensive Insurance Analysis provides an accurate assessment of whether HNW clients are covered the way they *think* they are. Our analysis often exposes gaps in coverage that can save a client from financial disaster should a significant problem occur. Please let me know if you'd like to provide an analysis to a HNW client.

Could your clients be at risk of a significant decline in net worth if they suffer a loss or get sued?

Let's work together to make sure they are protected. A little foresight can protect a lot of wealth.
